

MULTI BATTERY CHARGER

SATCOM

SKU#CH-LC4

OVERVIEW

The CH-LC4 battery charger is designed to charge up to 4 batteries of the Sat-Com range of products from any AC voltage source ranging from 90 to 264 Vac 50/60 Hz.

The 4x Chargers are built into a convenient ruggedised waterproof carry case which can be plugged into any AC source of 90 - 264Vac or connected to any 24V DC source to charge batteries in the field.

The internal charge controller is set to optimise and minimise recharge times of the 13 Ahr and 26 Ahr Li-Ion batteries for the radio equipment.

The charge level of each battery is indicated while the battery charge in a percentage until it indicates BATTERY FULL.

The user can easily determine charge levels of any battery by merely installing the battery onto a charger and read the result in few seconds.

Once a battery is fully charged, the user can remove the battery and charge another battery in that position.

Input Voltage range	90 - 264 Vac (5A / 15-36 Vdc)
Charge Current	1 - 3.5A (12.8Vdc)
Charge Protocol	MPPT
Charge Time	<3hrs ~13Ahr, <6hrs ~ 26Ahr
Dimensions	55 x 30 x 20 cm
Weight	<10 kg
